

3G Wireless Setup (Huawei E220) – Mac OS 10.5 (Leopard)

- 1) Unplug the 3G modem.
- 2) Download the Mac OS 10.5 Driver from our 'Downloads' page and install the "Mobile_Connect_Drv_App.pkg" enclosed into the zip file.
- 3) Plug in the modem.
- 4) Open System Preferences -> Network.
- 5) Click on the "+" and from the Interface drop-down choose "HUAWEI Mobile".
- 6) Name it whatever you want (for example 3G Connection), and click "Create".
- 7) Select your newly created connection and place *99# in the Telephone Number.
- 8) Click on "Advanced".
- 9) Under modem, choose Vendor "Other", and then choose the HUAWEI 3G Modem (could be named differently - but will say Huawei) as the Model.
- 10) Click OK, then click on Connect to test your connection.
